Introduction of elibrarycloud.com

Cloud technology means providing all the computing services required for your organization online and at one place. As elibrarycloud.com is online library software based on cloud technology, all data of the library is stored on the cloud. Therefore, all the data of the library remains safe on the cloud and no need to back up. Librarians can do all library functions on mobile. Therefore, librarians can access library data with the help of mobile phones or tablet wherever they are. Software is available in English, Hindi and Marathi language and has been specially developed keeping in mind the requirements of all kinds of libraries. All the services required by the libraries have been introduced in a very simple manner.

A librarian is only required to record vouchers in working out library accounts; From that all records required for audit viz. Daybook, Ledger, Receipt & Payment Report, Profit or Loss Statement, Balance sheet, Voucher File etc. are prepared also, due to cloud technology, auditors can conduct online audits.

Classification of books, updating of periodicals etc. this work is regulated by the experts of the software team. Also, training and technical services are provided through software's experts.

elibrarycloud.com is a universal software solution for all kinds of libraries including research library, school library, college library, public library, private library, university library or any other. More than 200 public and college libraries in Maharashtra state has been computerized with elibrarycloud.com.

Book Store

Book store has been introduced to share book data entry. It has more than 350000 book information available. If the librarians select the book from these, there is no need to record the book information again, only the book accession number and the book purchase details are required to be entered.

Periodical Store

Information (name, address, publication, phone, email, website etc.) of most magazines published; has been made available in Periodical Store. Out of these periodicals are selected and periodical supply and attendance is taken. All necessary reports are available.

Account Section

Software is powered with book keeping services of accounting. Librarian is only need to enter voucher details, reports like day book, ledger, receipt and payment, trail balance, profit or loss statement, balance sheet statement etc. It saves librarian's lot of work and time. Account section also allows online line of records.

Periodical Money Order

Libraries can download the money order form to make a money order for the periodical. It will show the details of the library and periodical along with the address. Also the annual subscription of the magazine will be shown along with the commission of the post office.

Online Annual Report

The facility of submitting the annual report directly to the office of the District Library Officer has been provided online. Therefore, the updated information of the library will be available at the office of the District Library Officer.

Computerization without Computer

Software is based on cloud technology; librarians can work on mobile and manage the entire library better. Also buy a wireless printer for printing. So even if the libraries do not have computers, the library can be computerized. So the library can be computerized with less investment.

All Necessary Reports

The library has to keep 26 types of records in the library. All records/information sheets/lists will be prepared by order computerization. It saves extra work and time. Also there is no need to purchase printed records/sheets.

Mobile App for Readers

A mobile app is provided for readers to search books by subject or author at home. Also, readers can see the information about the previously read and due books.

Online Training and Technical Support

Online support makes it possible to provide services anywhere in the world. There is no need of personal visit.

Services Of elibrarycloud.com
